#### FOREWORD

The British West India colonies have, within the past decade, afforded one of the most popular fields of research in colonial history. Since 1913, studies of various phases of their political, social, economic and constitutional development have been undertaken at the University of London, Oxford, Cambridge, the University of Paris, the University of Wisconsin, the University of California, the University of Indiana and Yale, and the results of such investigations are being made known in a notable series of monographs now in the course of publication.

The great amount of interest evinced in the past of those minor British possessions of to-day occasions no surprise when it is recalled that for more than two centuries they constituted the most highly valued portion of Great Britain's far-flung holdings and that innumerable pressing imperial problems were first encountered and solved in them.

Their long neglect by historical students can be ascribed only to their later relatively low state which caused them to stand in such striking contrast to the prosperous North American mainland colonies, undeveloped in the days of West India glory, and to those vast and enormously rich Britishcontrolled regions outside the western world which were acquired after the decay of the sugar islands—a contrast which for three quarters of a century tended to draw attention from the latter. Only in recent years, when the study of imperial history as a whole has revealed them in their true perspective, have the perplexing questions of tropical colonization in the Caribbean possessions again seemed worthy of serious consideration.

This booklet is a by-product of a study of West Indian economic history after the Peace of Paris now nearing its completion, and is being published with the hope that the clearing of a new path will be of assistance to those entering in upon the exploration of what is largely virgin territory. It will be followed shortly by another designed to aid those using the official correspondece of the governors of the various West India colonies in the same period.

The title indicates the exact nature of the work. It should be noted that it does not include correspondence with various powers relative to the slave trade and slavery in general, treaties on those subjects made with foreign nations, or papers relative to apprenticeship and emancipation. It does, however, include all published papers on both the trade and slavery as related to the British Caribbean and all other Common Sessional papers dealing with those regions in any way, from the Peace of Paris to the coming in force of the Emancipation Act, and is complete within those limits.

The list will be found particularly serviceable for the use of documents in the many collections which personal experience has shown are unprovided with the several early indexes published by authority of the lower chamber.

# A Check-List of House of Commons Sessional Papers Relating to the British West Indies and to the West Indian Slave Trade and Slavery, 1763-1834.

The year denotes the session, the Roman numeral the volume, the figure in parenthesis the number, according to the sessional list, at the foot of each paper and the Arabic numeral the manuscript page numbering in the House of Commons collections.

A given paper is properly called for as follows—"Great Britain, House of Commons, Sessional Papers, year, volume, number." The title need not be given. The papers contained in a particular volume will be found listed in the front of it, with both sessional and page numbers indicated. However, few collections are page numbered. In such cases, thumbing must be resorted to, with the indicated page number serving as a clue to the paper's approximate location.
